

# **CIM MANAGER SUITE**

**Express Your CIM**

[www.ctcsoftware.com](http://www.ctcsoftware.com)

**Civil 3D** and AutoCAD production management staff will greatly benefit from the CIM Manager Suite. Tools for automated Styles, Layer, and Linetype creation and editing will make supporting production teams easier than ever.

- Speed up template Layer and Object Layer Settings management through dynamic spreadsheet syncing
- Improve template management with automated annotation and Civil 3D styles tracking and replacing
- Automate Description Key Set and Figure Prefix DB management through spreadsheet syncing
- Easily create and edit Linetypes without dealing with tedious .lin files

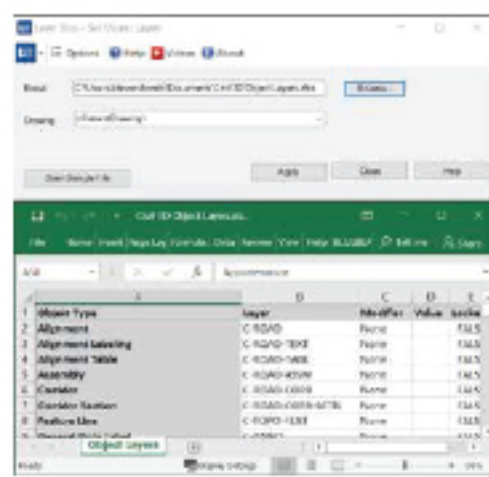

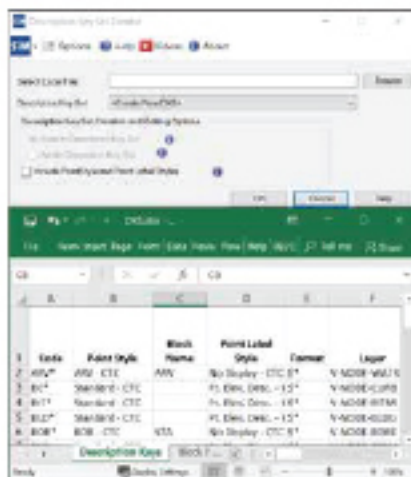

## FREE TOOLS

### Linetype Manager

Easily create and edit AutoCAD Linetypes with an intuitive interface. Avoid having to edit and create Linetypes in a .lin file. All operations write to a native .lin file, ensuring compatibility with all AutoCAD platforms.

- Create and edit AutoCAD Linetypes through an intuitive interface
- Speed up Linetype management in template and drawing files
- Avoid having to edit Linetypes in an AutoCAD .lin file

## PREMIUM TOOLS

**STM**

### Survey Template Manager

Greatly improve survey template management through automated configuration of Description Key Sets and Figure Prefix Databases. Easily export, import or sync settings from an Excel spreadsheet. Automate Layers and Styles creation and editing.

- Speed up template management by working with syncing Excel spreadsheets instead of the tedious Description Key Set and Figure Prefix Database interfaces
- Export Description Key Set and Figure Prefix Database settings to Excel spreadsheets
- Sync and update Description Key Set and Figure Prefix Database settings from Excel spreadsheets
- Automatically create and edit Point and Survey Figure Styles and Layers 3D Styles, Text Styles in Dimension or Table Styles, and more.

**TT**

### Template Tracker

Track down the use of Layers, Text, Dimension, and Leader Styles in any drawing or template and replace and edit these embedded elements throughout a template. This includes use of Layers in Civil 3D Styles, Text Styles in Dimension or Table Styles, and more.

- Speed up template management by never having to search for where Layers and Styles are used
- Track, replace and edit the use of embedded Layers in Civil 3
- Easily manage annotation styles by tracking where they're used
- Save time through easy search and query fields to narrow down results

**LB**

### Layer Boss

Speed up Civil 3D Layer management and creation by syncing with an Excel spreadsheet. All Layer Properties can be managed from an external spreadsheet, allowing faster template management. All Civil 3D Object Layer settings can be synced in the same way. Initial spreadsheet creation occurs through a simple export option from any drawing or template file.

- Export Civil 3D Object Layer settings to an Excel spreadsheet
- Sync and add Civil 3D Object Layer settings from any Excel spreadsheet
- Export AutoCAD Layer Properties Manager settings to an Excel spreadsheet
- Sync and add AutoCAD Layer Properties settings from any Excel spreadsheet
