# BIM DATA SUITE

**Express Your BIM**

[www.ctcsoftware.com](http://www.ctcsoftware.com)

**BIM Data Suite** makes it easy to extract project data to Microsoft SQL Server, JSON or XML, allowing your team to create a myriad of reports or to integrate Revit data into your other systems.

## TOOLS

### Project Activity Logger

#### Common Challenges

- Aggregating statistics and data of activity in on-going Revit projects
- Detecting problems encountered as projects progress
- Generating accurate and complete reports of current workflows, resources and expertise

#### Solution - Project Activity Logger (PAL)

- Lightweight background capture of key performance indicators for Revit projects
- Realtime availability of data on workshared projects
- Data stored allows easy connection & visualization with popular business intelligence software

### Project Snapshot Exporter

#### Common Challenges

- Getting data from Revit project elements into other software
- Storing Revit project data as the project changes over time
- Consolidating data from multiple Revit projects

#### Solution - Extract Data in Neutral Formats

- Extract project data to Microsoft SQL Server
- Extract project data to XML files
- Extract project data to JSON files
- Extract project data to CTC Model Compare files

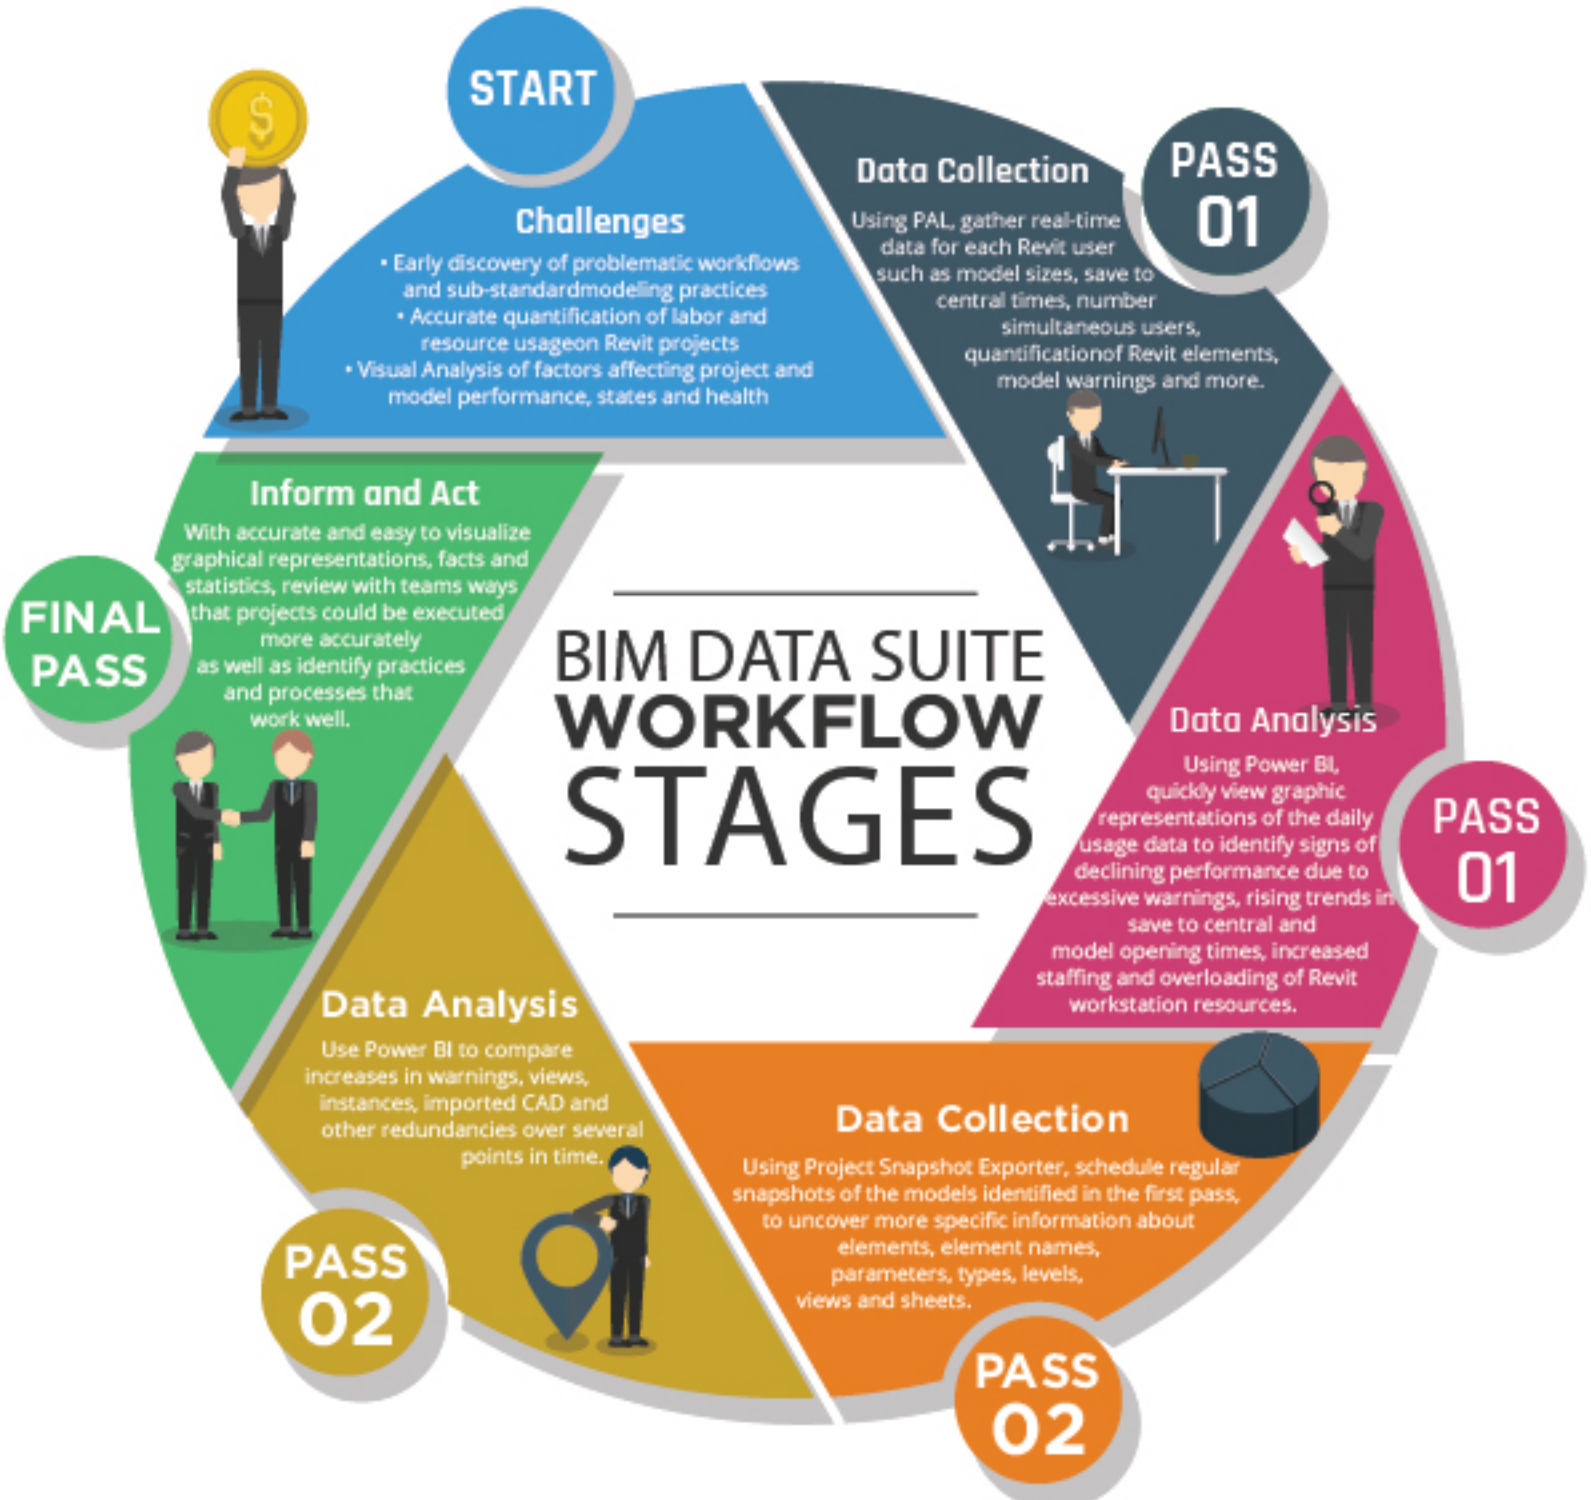

Your own tools such as:

Power BI

Microsoft SQL Server  
Business Intelligence Services
