# CIM Manager Suite™

CIVIL INFORMATION MODELING

TOOLS ™

The CIM Manager Suite contains Civil 3D<sup>®</sup> and AutoCAD<sup>®</sup> tools for efficient CAD management, including content and template creation and editing.

# Linetype Manager (Free Tool)

Create and edit AutoCAD linetypes through an easy-to-use, graphical interface instead of the tedious .lin file.

reast ousers in the end this increases the between user is a set of the between user is a Speed up template maintenance by tracking and replacing embedded layers, text, dimension and leader styles in any drawing or template.

## **Survey Template Manager**

Speed up Civil 3D survey template management by automatically creating and syncing description keys and figure prefix databases from an Excel® spreadsheet.

### Layer Boss

Optimize layer management by automatically creating and syncing template layers and Civil 3D object layer settings from an Excel spreadsheet.

Civil 3D and AutoCAD production management staff will greatly benefit from the CIM Manager Suite. Tools for automated style, layer and linetype creation and editing will make supporting production teams easier than ever.

- Build better CAD standards
- Edit/create templates quickly
- Efficiently update project standards
- Validate standards compliance
