

# NEXUS SUITE

CTC SOFTWARE  
A SYMETRI COMPANY

Three powerful tools with one mission -  
optimize your BIM workflows

The Nexus Suite™ is designed to give AEC firms the control, clarity, and collaboration they need to thrive. With Content Management System (CMS), ALLY and PAL, you can enforce standards, track activity, and manage content all from a unified platform built for Revit® and beyond. These tools transform everyday challenges into streamlined processes, helping your teams deliver projects faster, smarter, and with confidence.

## CMS - Content Management System

- Centralized libraries for Revit®, AutoCAD, PDFs, and more.
- Revit Family Checker ensures compliance with standards.
- Cloud-based access for remote collaboration.

## ALLY - Standards Enforcement

- Customizable rule sets to enforce modeling standards.
- Prevent risky actions like exploding CAD files.
- Real-time feedback with flexible override options.

## PAL: Project Activity Logger

- Track user actions in Revit® for visibility and accountability.
- Visual dashboards reveal patterns and bottlenecks.
- API integration for advanced reporting and BI tools.

The Nexus Suite™ turns complexity into clarity. From enforcing standards to tracking activity and managing content, these tools empower your teams to work smarter, faster, and more consistently—every project, every time.
